Press Release

22/3/2016

75 years of innovation, ergonomics, design, quality, technology and service

STANDARD MACHINE ELEMENTS WORLDWIDE

With its 75 year history in components for industry, ELESA represents a point of reference for designers and engineers. The widest range of standard components in engineering plastics and metal, metric or inch, accounting for more than 40 thousand product codes, combines throughout its history, reliability and efficiency to care for innovation.

From the beginning, Elesa has been able to pay maximum attention to the development of plastics and processing technology, always at the forefront even in times of great change.

A success made possible thanks to the choice of internationalization that led to the establishment of 11 overseas branches to consolidate the group's presence, and to the collaboration with the most qualified global distributors that ensure an efficient and timely service in more than 60 industrialized countries. ELESA international sales network gives its customers full access to all assistance services, as well as technical support, always in close cooperation with the headquarters in Monza.

A business culture strongly focused on quality design and ergonomic research, recognizable as ELESA products worldwide.

We will continue in this way!
