Two-way linear actuator connectors GN 132.25 are based on two-way connector clamps. The additionally provided mounting holes are used to connect to the drive key of a linear actuator. Bores with the designation **G** are equipped with sleeve bearings.

With the screw locations **z**, the play of the guide bores d_1 / d_2 can be adjusted or the linear actuator connectors can be clamped after adjustment. Type B is equipped with seals at the screw locations.

For quick clamping without tools, the cap nuts can be replaced by the adjustable hand levers GN 911.3 (see page).
