MTC-S | Latch clamps

with safety stop, steel or stainless steel

HANDLE
Polyurethane, red colour.

STANDARD EXECUTIONS
- MTC-S-T16: AISI 316 stainless steel.

FEATURES AND APPLICATIONS
All articulated joints are lubricated with special grease. MTC-S latch clamps are particularly suitable for equipment and applications with strong vibration stresses where it is required to assure the holding of the clamp engagement against accidental opening.

The clamp opening is obtained by actuating the button to disengage the safety device, thus it is possible to operate with the control lever.
