SECURITY DEVICE OPERATION

VLS security lobe knobs have been designed to be unscrewed only by authorised people, provided with the security key. Without the security key, the knob turns without unscrewing.

1. Clamping: clamp the knob by screwing it as for a normal knob. Mind that the security key is not inserted.
2. Unscrewing: simply insert the security key (without turning it) and unscrew the knob.

FEATURES AND APPLICATIONS

The particular design of the internal device and of the flange helps the drainage of any dirt (dust, earth, liquid).

Suitable where it is necessary to prevent the loss of the knob.

The elastic fork, housed in the groove of the knob can turn freely.

The coiled ring connects the elastic retaining ring to the chain.

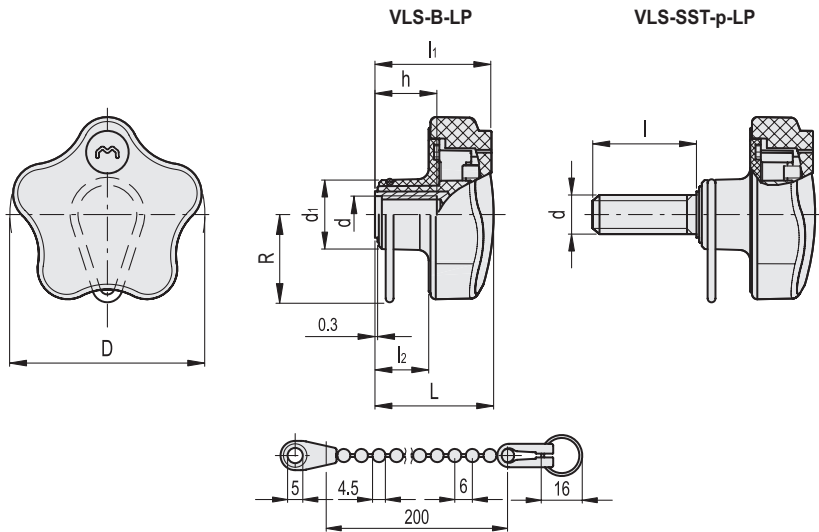

SPECIAL EXECUTIONS ON REQUEST

- Knob with retaining cable CV-T (see page -) in polyethylene black colour.
