

## Quick assembly IP65 quarter-turn locking latches from Elesa

Elesa's new series CQ and CSL series IP65 latches incorporate an ingenious quick assembly spring clip mechanism which accommodates door panel thicknesses from 1mm to 2mm with a simple insert and press fitting process – no lock nuts are required as the saw tooth springs take up the recessing adjustment and lock the unit in place.

Double bar and triangular key inserts are complimented with a cylinder lock version. The CQTL and CSL versions also incorporate an integral finger pull handle to ease door opening. Latching cams are supplied complete assembled in a variety of depths to facilitate use of different doors and frame combinations.
