

Innovative Pneumatic Switch Bridge Handle from Elesa

The new EBR-PN bridge pull handle from Elesa enables use of remote air control for interlocking, multiple latching systems etc. where electrical systems are not considered safe or where they may be subject to corrosion. Push button operation of the integral valve, together with manually gripping the handle permits one-handed opening of doors, equipment, safety guards etc.

The EBR-PN incorporates a single acting or double acting valve to connect with standard industrial pneumatic controls. It is likely to be of value in industries such as: chemical and petrochemical, oil and gas, power, mining, building/construction, food and beverage, water and marine.

Further information regarding Elesa products may be found at: www.elesa.co.uk or follow them on twitter: [www.twitter.com/ElesaUK](https://twitter.com/ElesaUK) – also see www.youtube.com/elesauk.
