

New 90° stability handles from Elesa

The new IF/IFF series 90° stability handles from Elesa provide quick-fit support on powered hand tools such as grinders, sanders, disc cutters, drills etc. or related motor driven workbench equipment, where they offer hand protection at one end or at both ends as required.

They provide a comfortable grip on vibrating power tools in a manual bracing/support role, with inboard flanges (IF series) or dual inboard/outboard flanges (IFF series).

IF and IFF handles are manufactured in black gloss reinforced polyamide with M8 or M10 male or female fittings for simple installation without tools.

Further information regarding Elesa products may be found at: www.elesa.com or follow them on twitter: [www.twitter.com/ElesaUK](https://twitter.com/ElesaUK).
