

New recessed pull handle with integral latch/lock from Elesa

The new Elesa GN 115.10 recessed pull handle allows 2-in-1 fitment of pull handle and latch in a robust zinc-die package with integral lock. This greatly simplifies installation where previously 2 separate items would be required – thus time and cost may be saved with a single Elesa item.

The GN 115.10 may be fitted to panels of up to 7mm thickness and comes supplied with triangular, square or two-wing key locks or with cylinder lock/key mechanism oriented to the left or right of the handle insert. Finish is either black or grey epoxy – overall size is 128x83mm.

Further information regarding Elesa products may be found at: www.elesa.com or follow them on twitter: [www.twitter.com/ElesaUK](https://twitter.com/ElesaUK).
