

Press Release

Elesa “V0” certified quarter-turn latches, locks and bridge handles

“V0” certification to UL-94 V is an increasingly common requirement for equipment in the electrical sector – so Elesa are delighted to offer yet more quarter-turn latch hardware and bridge/pull handles in their AE-V0 series.

The range includes the CMT.AE-V0 lever latch with novel fold-away thumb knob for access panels of all kinds where security is not an issue, plus the CQT.AE-V0 round bezel and the quick assembly CQTF.FM-AE-V0 square bezel latches with key. All are to IP65 for use on enclosures, cabinets etc. They are manufactured in a machine grade plastic polyamide based technopolymer.

The companion M.443 AE-V0 fixed handle series of bridge style pull handles is also in this tough “V0” certified material with lengths from 109mm to 196mm.

Further information regarding Elesa products may be found at: www.elesa.com or follow them on twitter: [www.twitter.com/ElesaUK](https://twitter.com/ElesaUK).
