

Press Release

Elesa Ergostyle® for functionality, for ergonomics, for aesthetics

The Elesa Ergostyle® range of standard machine components has been conceived for a broad spectrum of applications, typical of new market segments. Ergostyle® elements are destined for hospital and medical equipment, scientific instruments, laboratory fittings, office furniture, leisure and sporting equipment, and, generally, whenever aesthetics and user-friendliness are key requirements for the benefit of the product.

Specific components include the ETK three-arm handwheel customizable with user marking and with smooth cavity free design, also EMW monospoke handwheels with revolving handle or fold-away safety handle.

This commitment to technology and design is coupled with a corporate culture committed to product quality for the mechanical industry, machinery and industrial equipment manufacturing companies.

Elesa Ergostyle® spans ranges of crank handles, knobs, wing nuts, tubular handles, bridge handles, pull handles, adjustable clamp levers, grip knobs, lobe handles, control levers and lever latches.

Further information regarding Elesa products may be found at: www.elesa.com or follow them on twitter: [www.twitter.com/ElesaUK](https://twitter.com/ElesaUK).
