

ATEX compliant standard components for hydraulic systems – from Elessa

ATEX compliant components from Elessa ease your pathway to equipment compliance and nurture confidence in the minds of users – so supporting hard won manufacturing reputations.

Elessa's stylish product range of hydraulic components for ATEX equipment includes: plugs, breather caps, breather caps with dipstick, oil level indicators (plastic), oil level indicators, (aluminium) and oil circulation sights.

Coupled with Elessa technical and product support from end to end of the supply chain, it has never been easier to specify ATEX hydraulic accessories with confidence.

Application is expected to include many pumps, anti-spark installations, oil and gas, water and sewage and petrochemical plants, as well as mines and flour mills.

In particular, the range includes GN 743.6 oil level indicators, SFP+a-EX breather caps and TN-EX equipment plugs. This new ATEX range of liquid level sight gauges, breather caps, level indicators and plugs are laser engraved and provided with a full instruction/safety leaflet to enable users to correctly incorporate them in systems complying with Health and Safety Requirements according to 94/9/EC ATEX European Directive (explosive atmospheres) for equipment in Group II, category 2GD.

The GN 743.6 aluminium oil level indicators feature ESG safety glass with FKM Viton® sealing ring. SFP+a-EX breather caps incorporate a
