

Protecting Personnel and Equipment – latches from Eles

Wherever personnel must be protected from potentially dangerous equipment – or where vulnerable equipment needs protecting from people or the elements – then generally an enclosure system of some kind is used, coupled with a door access device. The Eles range of standard latches is ideal for this purpose.

Ranging from their [CMT wingknob](#), through [CSMT T style quarter-turn handles](#) and [VC rotor cams with lobe knobs](#), Eles cover typical wall-mount enclosure requirements. Larger cabinets are catered for with their [CSMH insert T handle latches](#) and [CLC swinghandles](#). For sliding doors and drawers the Eles [PR-CH series of snap-in flush pull handles](#) with lever latch provide keyed security with a recessed handle in one compact unit.

Further information regarding Eles products may be found at: www.elesa.com or follow them on twitter: www.twitter.com/ElesaUK.
