

Press Release

06/04/2020

Two pulmonary ventilators gifted by Elesa S.p.A. to the San Gerardo Hospital in Monza

Elesa didn't hesitate to join the initiative of LILT (*n.d.t the Italian league for the fight against tumors*) promoted through the #Stopcoronavirus Aiutaci a Fermarlo! (*n.d.t.#Stopcoronavirus Help us to Stop it*) campaign. Thanks to this the Italian company had the opportunity to donate two pulmonary ventilators to the intensive care unit of the San Gerardo Hospital in Monza, which is the Coronavirus hub for the area of Monza and Brianza.

Elesa history has deep roots in the Monza and Brianza territory also thanks to the Social Responsibility and charity activities developed in support of several institutions. Among these institutions, there is also LILT which Elesa has been supporting over the last 20 years.

A responsibility that Alberto Bertani, the Elesa President, has taken very seriously. In fact, he responded to the LILT call by taking over the expenses for two pulmonary ventilators which were delivered on the same day when Elesa closed the factory, according to the local government decree.

A decision taken with the utmost responsibility and with a promise: we will be back stronger! In fact, Elesa will open on Monday, April 6th.

Before the lockdown the company, which is the international reference for standard components destined for the mechanical, machinery and industrial equipment sectors, managed all operations to ensure a sufficient product stock to the 12 subsidiaries all around the World and to the entire worldwide sales network, which are still working accordingly to the local government regulations.
