

Components for
medical equipment,
precision instruments,
rehab and disability aids

STANDARD MACHINE ELEMENTS WORLDWIDE

elesa®

ELESA presents an extensive range of components in **engineering plastics and metal designed for medical equipment, precision instruments, rehab and disability aids** for applications requiring the use of corrosion resistant materials in compliance with the most rigorous hygiene laws.

ELESA uses electricity produced only from 100% renewable sources, i.e. energy produced with natural resources (water, sunlight, wind, tides, geothermal heat, etc.) which therefore do not involve CO₂ emissions (which are instead produced by coal, oil and gas).

Over 80 years of leadership make ELESA the point of reference for designers and manufacturers. Over 80,000 product codes create an annual production of tens of millions of pieces, more than 300 patents worldwide, 56 international awards in Industrial Design, ISO 9001 certification, ISO 14001, ISO 45001, ISO 27001 and AEOF, are the numbers that sum up our business. 15 international subsidiaries and a close collaboration with the most qualified distributors worldwide ensure an efficient and timely service coupled with the guarantee of technical consultancy from the groups' Monza Headquarters.

Points of strength

- 300 PATENTS AND REGISTERED DESIGNS
- 58 INDUSTRIAL DESIGN AWARDS
- WORLDWIDE DISTRIBUTION
- FULL STOCK AVAILABILITY
- CUSTOMISED SOLUTIONS
- TECHNICAL COMPETENCE AT THE CUSTOMER'S SERVICE
- ISO 9001 - ISO 14001 - ISO 45001 - ISO 27001

White color with dirt-proof surfaces

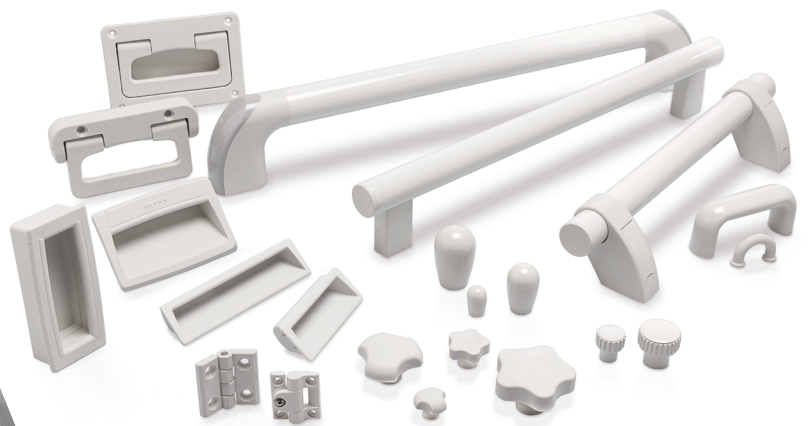

CLEAN line

The white color RAL 9002 is particularly suitable in medical environments, as it allows the prompt identification of any dust or dirt traces.

From a psychological point of view, it gives the operators and patients a sense of sterility and maximum cleanliness.

Stainless steel inserts for applications where provisions of law make it mandatory to use special corrosion-resistant materials.

Compact shapes, smooth surface and glossy finishing prevent any deposit of dirt, dust or machining residues.

Corrosion Resistance

INOX line

ELESA offers a wide range of products in plastic with AISI 303, AISI 304 and AISI 316 stainless steel inserts or entirely made in AISI stainless steel.

Excellent corrosion resistance for applications where provisions of law make it mandatory to use special corrosion-resistant materials.

Safe, comfortable and non-slip grip

SOFT-TOUCH line

The SOFT-TOUCH thermoplastic elastomer coating certified according to FDA (U.S. Food and Drug Administration) provides a secure, comfortable grip even under unfavorable conditions of use such as in the presence of moisture and grease and improves the comfort for the operator's hand, allowing absorption of any vibrations during operation.

Special addition of color in the molding material or colored plastic caps and covers allow a total aesthetic combination to customer's specific applications.

Self-sanitization against bacteria and fungi

SAN-Antimicrobial Components

Our SAN-Antimicrobial components are made from a special technopolymer infused with silver ion additives on an inorganic base-free from active pharmaceutical ingredients, antibiotics, or pesticides. These silver ions inhibit the growth of harmful bacteria and fungi by penetrating their cell surfaces and disrupting their DNA.

Thanks to a controlled-release mechanism, the antimicrobial properties remain effective over time, even after repeated washing cycles, ensuring long-lasting protection.

Available Colors:

RAL 7021 gray-black

RAL 9016 white (new)

Each component features a laser-engraved logo on its matte surface for easy identification.

Laboratory tests

Laboratory tests show that 98.9% of bacteria load is eliminated over the course of 24 hours (ISO 22196: 2011). All components of the SAN-Antimicrobial line are provided with the Statement of Compliance "Antimicrobial Properties of Materials". Tests were carried out by CSI S.p.A., an accredited and recognized laboratory by ACCREDIA (n.0006), being the National Accreditation Body. The laboratory complies with the requirements of UNI CEI EN ISO / EC 17025. Certificate identification: C0144 \ FPM \ FOOD \ 19_1_2.

Strains used

- Staphylococcus Aureus ATCC® 25923™ (antimicrobial activity 99.9%)
- Escherichia Coli ATCC® 25922™ (antimicrobial activity 99.9%)
- Klebsiella Pneumoniae ATCC® 13883™ (antimicrobial activity 99.8%)
- Pseudomonas Aeruginosa ATCC® 27853™ (antimicrobial activity 99.9%)
- Candida Albicans ATCC® 10231™ (antimicrobial activity 98.9%)

Ergonomics and Design. The service of functionality and security

Ergostyle® elements were initially conceived for a series of new market segment applications including hospital and medical equipment, sports and leisure equipment, scientific instrumentation and office furniture. Nowadays Ergostyle elements are also applied in more traditional industrial sectors, whose machines and equipment have undergone a profound aesthetic and design renovation over the last few decades. Elements with modern, elegant shapes with inserts in 7 ELECOLORS® allow the components to be better integrated on machinery from an aesthetic point of view contributing to enhance their value. In addition, the colored inserts can be used to differentiate machinery functions.
