MPI-15
Position indicator with magnetic sensor

The position indicator MPI-15, made of a multifunction display with integrated magnetic position sensor, combined with the magnetic band M-BAND, is a complete system for the measurement of linear and angular displacement. Characterised by an extremely easy assembly, it allows precise alignment and positioning, reducing time and machining procedures to the minimum.

Magnetic measurement system: absence of contact between moving parts
- No wear: no need of maintenance
- Not affected by moisture, dust, oils and process residues
- Insensitive to vibrations

Power supply
External battery 1.5 VDC. Buffered memory during battery substitution.

Display
Multifunction LCD with 5 function keys.
Programmable measuring unit.
Linear and angular measures.
Programmable offset function.
Resolution: 0.1 mm - 0.01 in - 0.01°
Precision: 0.1 mm
Repeat accuracy: 0.01 mm

Magnetic sensor
IP65 protection level
Cable length up to 20 m.
Operating speed up to 5m/s.
Distance between sensor and magnetic band to ensure a correct reading of the displacement: 2.5 mm max.

Magnetic band
Magnetic pole pitch 5 mm
Easy assembly thanks to the adhesive tape
Cover strip for protection against possible mechanical damages.
MPI-15

Position indicator with magnetic sensor

- Features and applications
MPI-15 position indicator, made of a LCD multifunction display with integrated magnetic position sensor, combined with the magnetic band M-BAND, is a complete system for the measurement of linear and angular displacement. Characterised by an extremely easy assembly, it allows precise alignment and positioning, reducing time and machining procedures to the minimum.
- Multifunction LCD with 5 function keys.
- Absolute/ incremental mode.
- Programmable offset function.
- External battery power supply 1.5 VDC.
- Buffered memory during battery substitution.
- Accidental polarity inversion protection.
- Magnetic sensor envelope material: anodized aluminium.

Special executions on request
The special plate display may be supplied with customised graphic symbols, marks or writings.
Magnetic sensor with cable length different from the standard executions shown in the table, up to 20 m maximum.

- Multifunction LCD with 5 function keys.

(1) Resolution: the smallest change in length that the instrument is capable of displaying.
(2) Precision: the maximum deviation of the value measured by the instrument from the actual one.
(3) Repeat accuracy: the degree of closeness between a series of measures of the same sample, when the single measurements are carried out leaving the measurement conditions unchanged.

* Complete by specifying the sensor cable length in decimetres (10=1 meter).
Minimum length 0.2 m, maximum length 2.0 m.
Example: CE.99901-06 MPI-15-06 display with sensor cable length 0.6 m.
**MPI-15 assembly instructions**

1) Make a drilling of 42 -0.2 +0.5 mm x 90 -0.2 +0.5 mm in the metal sheet for the installation of the display.
2) Fix the display to the panel by using the specific mounting bracket (the screw is included in the supply).
3) Make a drilling of diameter 34 -0.2 +0.5 mm in the metal sheet for the installation of the battery case.
4) Fix the battery case to the panel by using the specific nut.
5) Fix the magnetic sensor by using M3 screws (not included in the supply). Distance between sensor and magnetic band to ensure a correct reading of the displacement: max 2.5 mm.

**Accessories on request**

M-BAND-10: the magnetic band M-BAND-10 is made of two separate parts: the magnetic band and the cover strip. The magnetic band is made of a magnetic tape, a carrier strip and an adhesive tape (Fig.2). The cover strip is made of a protection strip and an adhesive tape (Fig.1).

**M-BAND-10 assembly instructions**

The cover strip must be installed over the magnetic band to protect it against possible mechanical damages.

1) Clean the mounting surface carefully.
2) Remove the protective foil from the adhesive tape of the magnetic band.
3) Stick the magnetic band on the mounting surface.
4) Clean the surface of magnetic band carefully.
5) Remove the protective foil from the adhesive tape of the cover strip.
6) Stick the cover strip on the magnetic band.
7) In the absence of a seat for the housing of M-BAND-10, secure the ends of the cover strip to prevent unintentional peeling.
